“NEW! Album To Be Released Early 2009– Live in portugal”

Cat. No. JRS1082CD

The classical guitar selections of this CD were played at an evening concert in the ancient 13th century Cathedral of Évora, located in the Alentejo Province of Portugal on July 5th 2004. Maestro Del Forno said “The natural acoustics within the cathedral amplified the notes of the guitar from the ancient vaultings. It created an ethereal and spiritual atmosphere I have rarely witnessed during any of my concerts anywhere around the world. The notes resounded through the cathedral as though they were descending from space itself.”
